

**ENDURAGREEN® WATERBORNE
CONVERSION VARNISH**

Delivers ultimate durability and mar resistance with as little as two coats and can be used as a self-sealing system. is a freeze-thaw stable formula that is a water reducible, post catalyzed, lowVOC emitting technology that has excellent color retention and is suitable for cabinet, millwork, furniture and other high traffic interior wooden surfaces.

**ENDURAGREEN® WATERBORNE
BRUSHING URETHANE**

High quality, non-yellowing acrylic/urethane topcoat that provides a beautiful finish that will enhance the beauty of your wood projects. It is low odor, fast drying, low VOC, easy to apply and has excellent leveling properties.

**ENDURAGREEN® WATERBORNE
EXTERIOR URETHANE CLEAR & WHITE TOPCOATS**

Low VOC topcoat designed for outdoor use by the professional. Contains UVA for improved exterior protection against sunlight, moisture, and temperature variations.

**ENDURAGREEN® WATERBORNE
INTERIOR ACRYLIC WHITE TOPCOATS**

Opaque topcoat, easy to use low VOC designed for the professional Freeze-thaw stable formula with excellent color retention, water reducible and fast drying.

**ENDURAGREEN® WATERBORNE
INTERIOR ACRYLIC CLEAR TOPCOATS|SEALER**

Clear topcoat, easy to use low VOC designed for the professional. Freeze-thaw stable formula with excellent color retention, water reducible and fast drying.

**ENDURAGREEN® WATERBORNE
WHITE SEALER**

Water reducible, ultra-low VOC, tintable, high solids, ready to spray white sealer that has excellent build and filling characteristics. It is the perfect beginning to create opaque finishes for cabinets, millwork and MDF.

**ENDURAGREEN® WATERBORNE
ULTRA PIGMENTED SEALER**

Low VOC pigmented sealer designed for the professional. Ultra Pigmented Sealer is a fast drying easy to sand high-build sealer. Once dried and sanded it will accept any of the Mohawk topcoats (Enduragreen®, lacquer, pre-Cat lacquer, post-Cat lacquer, varnish, and urethanes) with excellent adhesion and performance.

**ENDURAGREEN® WATERBORNE
EXTERIOR WHITE SEALER**

Contains UVA for improved exterior protection against sunlight, moisture, and temperature variations. Its flexibility allows the sealer to move with the wood over seasonal changes and wood's natural expansion and contraction.

**ENDURAGREEN® WATERBORNE
BUBBLE BREAKER**

Will eliminate small bubbles that could appear on the finished surface when spraying at high temperatures and high humidity. Zero VOC, water clean-up, contains no lead or formaldehyde. Safe to use with any Enduragreen waterborne sealer or topcoat.

**ENDURAGREEN® WATERBORNE
EXTENDER**

Additive that can be used in any of EnduraGreen® waterborne products to increase the dry and/or working time. Use this additive when working on large surfaces or in warm to dry climates.

**ENDURAGREEN® WATERBORNE
COLORANTS**

Enduragreen colorants are high quality waterborne pigments with high tint strength. They are compatible with all Enduragreen products and utilize glycol free dispersions and surfactant blends. These pigments are finely ground to allow for tinting of high gloss products with minimal gloss reduction.
